

Street Graphics

Missing Direction for your Docks ?

We can get you in the right Direction

What is it?! Dock Graphics is a very aggressive adhesive that sticks directly to clean, dry concrete. DG is made of a unique texture to make it slip resistant. Boaters are constantly looking at the ground, why not give them something to look at?!

Dock Graphics For Concrete Docks

Street Graphics

What is it?!

Street Graphics is a very aggressive adhesive that stick directly to clean dry concrete and asphalt. Street Graphics is made of a unique texture to make it slip resistant, eliminating the need for an over laminate. People are constantly looking at the ground, why not give them something to look at?!

How does it work?!

Street Graphics has an adhesive back side and a little pressure, it sticks directly to asphalt/concrete, yet allows for easy removal. Street Graphics when installed as directed, last for months or years or more, depending on how much traffic and weather it's exposed to.

Slip Resistant!

The above results demonstrate that the product is slip-resistant and provides a high-level of slip-resistance for general applications on both wet and dry surfaces.

Safe!

The threshold for safety for slip resistance for walking surfaces has long been established at .50

Street Graphics exceed the standards set by ASTM, OSHA, ADA and UL by nearly double!

Before you begin

Be sure the surface is...

Smooth
Swept Clean
Completely Dry
Not Sealed

Cleaning & Removal

Never pressure wash
If needed, clean with mild soap and water.

Remove Street Graphics decals by lifting one edge and pull at a sharp angle with smooth, even tension. A scraper such as a putty knife may be used if needed. If possible remove the decal during the coolest part of the day. It may be beneficial to cut the graphic into stripes at least two inches wide, and pull off each strip.
